I N B L O O M

In Bloom is a print collection of four unique floral designs, each harnessing the power of the natural, vibrant colours of flowers as they would bloom in a meadow. Inspired by the outdoors, and with the idea of 'bringing nature inside', In Bloom captures the high point of flowers in action, at their most colourful and majestic. The power of digital photography has enabled the collection to form, by assembling a multi-layer of collaged images of silk flowers together, to form a dense and vivid array of flowers in bloom.

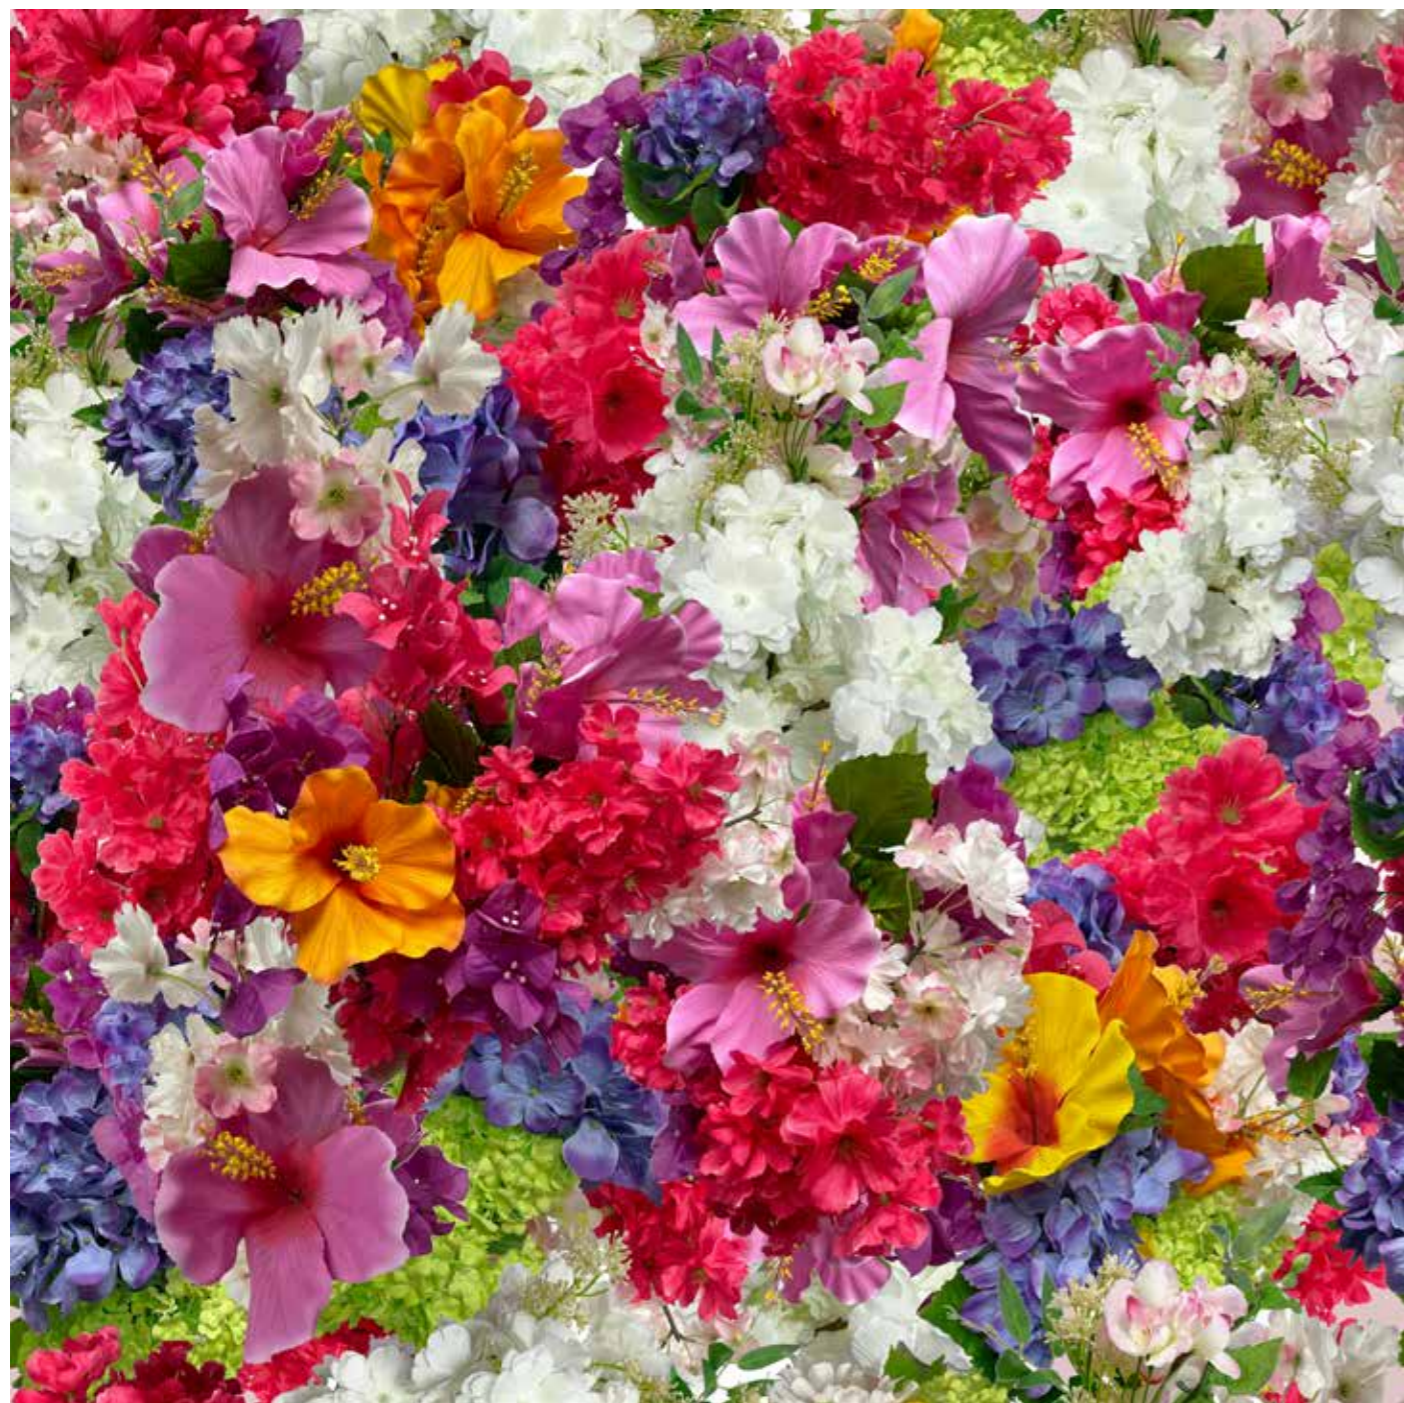

These designs can be printed onto any of our high-performance base cloths, including our new recycled inherent FR EcoTwist for a scheme that might require sustainability credentials.
